

RFID Countdown Reminder Wristbands

Product model

MH-CR02

Product highlights

Countdown time reminder, timeout timing, vibration reminder, LED screen display, RFID, rechargeable, long time standby, multiple straps to choosen

Product picture

Product Parameters

Countdown time setting

In increments of minutes or half an hour, up to 24 hours

Timeout timing

Countdown ends 30 seconds later, timeout starts, up to 60 minutes

Vibration reminder

Vibration motor reminder

LED screen display

Press the screen button to light up and check the remaining time

RFID chip capacity

1K Byte

RFID working frequency

13.56Mhz

Battery charging method

Magnetic charging

Battery charge voltage

DC5.0V

Charging time

60 minutes

Battery type

Polymer Lithium Ion Battery

Battery capacity	55mAh
Standby time	>100 hours
Working hours	24 hours
Wristband strap material	TPU material (Elastic and other straps are available)
Waterproof level	IP68
Functional Operation	
Countdown time setting	The countdown time can be set by the special time setter. In increments of minutes or half an hour, up to 24 hours.
Normal operation	When the wristband connects and induces time setter, the countdown time setting is completed and the countdown begins. Before the countdown time ends, if the wristbands accidentally induce the time setter again, the countdown time will not be affected (except for the reset instruction).
Countdown time suspend	If you want to stop the countdown time midway, you can use time setter to reset it, or connect the charging cable to charge and stop the countdown time.
LED screen display	During countdown time working, the green indicator light flashes slowly. Press the screen button to light up the display to check the remaining time. 30 seconds after the countdown ends, the timeout timer starts, red light flashes, and press the screen to light up the display to check the timeout time. After 1 hour of timeout, the bracelet stops working and the display goes off.
Vibration reminder	5 minutes before the countdown time ends, the wristband vibrates 3 times as a reminder, and when countdown time ends, the motor vibrates for 6 seconds as a reminder. When the timeout is 55 minutes, the wristband vibrates 3 times as a reminder, and when the timeout is 60 minutes, the wristband continues to vibrate 6 seconds as a reminder.
Low battery reminder	When the battery power is less than 20%, the red and green indicator lights will flash alternately.
Charging instructions	The red indicator light is on when charging, and the green light is on when fully charged.
System reset	If an abnormal situation occurs, you can reset the system by connecting the charging cable to charge.
